* At 0655 hrs. this morning, it is observed that a blue Lincoln town car was parked in front of the gate in, further a fire was going to the right side of the car. Security Guard on site failed to see what was going on, it was apparent that the fire was going for a while, burned was a large truck tire with other debris, the fire was distinguished and the police were called to remove the car. At approximately 0930 hrs. three men came to site to try and fix the car. The security company is notified, George Willis, he is informed of the matter, it would appear as though the guard was sleeping, therefore would explain why he did not see the fire or the car. Because this same guard has been seen and caught sleeping three various times before, we have a good reason to believe that he was sleeping again when all this was going on. I am assured that this guard will be rotated and will not be allowed back on site again.
